Software Quality Engineer | Test Automation

linkedin.com/in/pritham-ganesh-s-785092208

About me

Software Quality Engineer with experience in test strategy, UI/API automation, and CI/CD using Selenium, Karate, Python, and Java. Skilled in regression testing, root-cause analysis, defect triage, and cross-functional collaboration, with hands-on experience in Docker, Kubernetes, and cloud technologies.

Experience

Oct 2023-
Present

● Quality Engineer | IBM

- Designed and automated regression test suites using Selenium and Karate, achieving 85% automation coverage and enabling earlier detection of software defects.
- Integrated automated test execution into CI/CD pipelines, enabling continuous regression validation and earlier identification of quality issues.
- Performed root-cause analysis of application defects in collaboration with developers, providing diagnostic findings that contributed to a >95% defect acceptance ratio.
- Collaborated with development and cross-functional teams to investigate failures, clarify requirements and support defect resolution.

Mar 2022-
Apr 2022

● Intern | Exposys Data Labs

- Developed a CLI-based encryption and decryption tool.
- Encryption and Decryption performed using Caesar Cipher.
- Tool was developed in Python framework.

Education

Bachelor of Technology in IT

SRM Easwari Engineering College

2019 - 2023 | CGPA: 8.81

Skills

- Programming: Python, Java, C, C++
- Test Automation: Selenium WebDriver, Karate, UI Testing, API Testing, Mobile Testing
- Testing & Quality: Test Strategy, Test Planning, Regression Testing, Functional Testing, Root Cause Analysis, Defect Triage
- CI/CD & DevOps: Jenkins, Docker, Kubernetes
- Cloud: Microsoft Azure, IBM Cloud
- Tools & Version Control: Git, GitHub, JIRA, Xray

Certifications

- Claude Certified Developer - Foundations
- Cisco Certified Ethical Hacker
- Microsoft Certified: DevOps Engineer Expert
- IBM Certified - Cloud Advocate v2
- ISTQB Certified Tester: Foundation Level

Publications

- **Comparison of Network Intrusion Detection System for Software-Defined Networks using Tree-Based Classifiers**
 - Published under the topic "DISRUPTIVE TECHNOLOGIES FOR SUSTAINABLE DEVELOPMENT".
 - Published through Taylor & Francis on 2023.

Projects

- **Smart Interview Intelligence Platform**

- End-to-end candidate screening and ranking system. Includes recruiter dashboard and monitoring.
- Tech-stack:
 - Backend/API: FastAPI (Python)
 - ML: Sentence Transformers (embeddings), TF-IDF fallback, XGBoost for success prediction
 - Infra: PostgreSQL, Redis caching, Prometheus + Grafana, Docker Compose

- **LiveSOC: An AI-leveraged cybersecurity dashboard**

- A real-time Security Operations Center that ingests IDS logs (Suricata/Zeek), enriches and risk-scores alerts, and visualizes live activity on a world map and sortable dashboard to support fast triage and decision-making.
 - Tech-stack:
 - Backend: FastAPI (Python)
 - Streaming: Redis Pub/Sub → SSE
 - Database: PostgreSQL
 - Frontend: React + Leaflet
 - Deployment: Docker Compose (integrates with Suricata/Zeek)
-
